The embodiment in Fig. 1;

The embodiment in Fig. 2;

The embodiment in Fig. 3; and

The embodiment in Fig. 4A/B.

Applicants' provisionally elect to prosecute the embodiment in Fig. 3. Applicants designate that all claims 24-30 and 38-45, in the elected Group II, are generic.

Nevertheless, Applicants' respectfully traverse the requirement. Fig. 1 depicts a mount and control system 100 in accordance with a preferred embodiment of the present invention. Fig. 2 depicts a mount assembly 200 for use in the mount and control system in the preferred embodiment of the present invention. Fig. 3 depicts a control loop structure for use in the mount assembly in the preferred embodiment of the present invention. And Fig. 4A/B depicts a control algorithm for use in the control loop structure
